

Matheus Moreira Pessoa

Full-Stack Software Engineer | C# | .NET | Java | Spring Boot | Angular | SQL | AWS

Goiânia, GO - Brasil | 62 98582-1680 | matheus.pessoa.dev@gmail.com | GitHub | LinkedIn | Portfolio

Summary

Full-stack software engineer with experience in enterprise systems, public sector, education, integrations, cloud, databases and production support. I work from discovery and modeling to implementation, tests, deployment, logs, error diagnosis and continuous evolution.

Core skills

Back-end	C#, .NET, ASP.NET Core, Java, Spring Boot, REST APIs, microservices
Front-end	Angular, React, TypeScript, HTML, CSS, user experience
Data and cloud	Oracle, SQL Server, PL/SQL, Supabase, BI, AWS EC2, Amazon S3, Docker
Architecture	Clean Code, SOLID, DDD, Clean Architecture, tests, CI/CD, security

Experience

Argo Inteligência Digital | Software Engineer | Jun 2026 - present

Evolution and support of solutions used by Goiânia City Hall, covering business rules, integrations, tests, deliveries and the connection between engineering, public management, AI and data.

Óticas Brasil | On-demand PJ Software Engineer | Oct 2025 - Jun 2026

Web system integrated with Oracle and PL/SQL, supporting AWS EC2 migration, automation, analytical queries, BI and repository organization.

TCS | Petrobras | Mid-level Systems Analyst | Jan 2024 - Jun 2026

Remote work with OutSystems, Java, Microsoft Graph API, SharePoint REST, AWS S3, documentation, technical meetings and document management.

Sorigue | Playroll Spain | Freelance Tech Lead | Mar 2025 - Jun 2025

Short-term international project supporting architecture, .NET microservices, Azure, automated tests, CI/CD and technical communication in Spanish and English.

Senac Goiás | IT Systems Analyst | Jul 2022 - Feb 2024

Built the Copa Sesc system, working with development, databases, procedures, migrations, logs, BI, pipelines and support alongside infrastructure, DBA and DevOps teams.

State of Goiás | SEDI | Cast Group | 2020 - 2022

Support and evolution of state public-sector systems with OutSystems, C#, procurement rules, Scrum, dailies, planning and technical organization.

Featured projects

- Goiânia Data Portal - centralized public-data consultation and standardized navigation across indicators, dashboards and publications.
- Petrobras document management - integrations with Microsoft Graph API, SharePoint REST, AWS S3, OutSystems and Java.
- Copa Sesc - system built from scratch for tournament management, participants, matches, databases, logs and deployment.

Education

PUC Goiás - Systems Analysis and Development, 2018 to 2021. English in development - B1-level course in progress.
UFG postgraduate specialization in Artificial Intelligence and Data Science for Public Management, planned start.
